# Vari Bass

Accurate ⊕ Tunable ⊕ Professional

Vari Bass is designed for use in any professional recording space, home studio or hi-fi room. Made from wood and high-density acoustic foam, the bass trap can be tuned between 50Hz and 100Hz by simply rotating its wooden top (which has a series of resonant pots) until the problem disappears. A scale is included to show the exact frequencies on which Vari Bass is acting. The unit's stand-alone structure enables it to be repositioned as required and used in different rooms.

Cavity Depth  
1 - 19 cm  
2 - 15 cm  
3 - 4 cm  
4 - 0,5 cm

Vari panel can be tuned between 50Hz and 100Hz by simply rotating its wooden top. Recommended for rooms smaller than 10m<sup>2</sup>

**Performance**  
Designed to provide effective low frequency absorption between 60-125 Hz, it delivers maximum effectiveness between 75 -100Hz.
