

### FEATURES:

1. 1.0 Megapixel CMOS sensor
2. 2.8MM Lens
3. H.264 Code
4. Support Plug and Play 、 P2P Remote control Farnes rate up to 20fps
5. DC 5V/2A
6. Conpatible ONVIF Protocol
7. WiFi 802.11b/g/n

### Specifications :

| Item                 | WFSBD105                                                                                        |
|----------------------|-------------------------------------------------------------------------------------------------|
| Sensor               | 720P OV9712D CMOS                                                                               |
| Size                 | 1/4                                                                                             |
| Day and Night        | Yes                                                                                             |
| Infrared sensitivity | Support                                                                                         |
| Filter               | IR-CUT                                                                                          |
| IR LED               | Yes                                                                                             |
| IR Distance          | 8M                                                                                              |
| Visual Angle         | 65°                                                                                             |
| LENS                 |                                                                                                 |
| Lens                 | 2.8MM                                                                                           |
| Focus                | Fixed Lens                                                                                      |
| Aperture             | Auto                                                                                            |
| Video                |                                                                                                 |
| Compression          | H.264 Main Profile                                                                              |
| Picture Resolution   | Main Flow : 1280*720@20fps Minor Flow : 640*360@30fps                                           |
| Audio/ Alarm         |                                                                                                 |
| Audio input/output   | one channel audio input, one channel audio output                                               |
| Alarm way            | PIR                                                                                             |
| Alarm processing     | Push Alarm Messages to MobilePhone, Log record,SD card storage etc.                             |
| Network              |                                                                                                 |
| Protocal             | HTTP 、 TCP/IP 、 UDP 、 SMTP 、 DDNS 、 DNS 、 SNTP 、 DHCP 、 FTP 、 RTP 、 RTSP 、 UPNP 、 ONVIF 、 28181 |

|                         |                                                                                                  |
|-------------------------|--------------------------------------------------------------------------------------------------|
| Wirless                 | WiFi 802.11b/g/n                                                                                 |
| Features                |                                                                                                  |
| Mobile Phone            | Support iPhone 、Android                                                                          |
| Remote access           | Real time monitoring on App 、SD card playback and Cloud storage                                  |
| SD Card                 | SupportTF/micro SD card （Up to32GB）                                                              |
| Battery                 | Support                                                                                          |
| Anti-theft design       | Stay in 20 seconds to 30 seconds PIR automatically detects,<br>push messages to the mobile phone |
| Real-time Messages push | automatically push messages to the mobile phone,   Voice talkback                                |
| Physical properties     |                                                                                                  |
| Power Comsumption       | DC5V/2A                                                                                          |
| Temperature             | -10°~60°C                                                                                        |
| Humidity                | -10~85%                                                                                          |
| Weight                  | 150g                                                                                             |
