Q3-S350 V1.1E

Specification of PoE fiber switch with 5 ports
10/100/1000M RJ45 ports and 1 port 1000M
uplink SFP fiber slot port, port 1-4 can
support IEEE 802.3af/at PoE standard

Part Number: AVSR-1T43-00x3A-01

The AVSR-1T43-00x3A-01 series is a full gigabit PoE fiber switch independently developed by Raycore. It has 5*10/100/1000M RJ45 ports and 1*1000M SFP slot port. Port 1-4 can support IEEE 802.3af/at standard PoE power supply. single port PoE power reaches 30W, and the maximum PoE output power is 65W(at-110W). As a PoE power supply device, it can automatically detect and recognize the power receiving equipment that meets the standard and supply power through the network cable. It can supply power to POE terminal equipment such as wireless AP, webcam, VoIP, visual intelligent building intercom through network cable, and meet the network environment that needs high-density PoE power supply. It is suitable for hotel, campus, factory dormitory and small and medium-sized enterprises.

Unmanaged model, plug and play, no configuration, easy to use.

Features

- Full gigabit access, gigabit (TP/SFP) combo port uplink
 - All series supports "gigabit Ethernet port and gigabit SFP fiber port " combination, which enables users to flexibly build networking to meet the needs of various scenarios.
 - Support non-blocking wire speed forwarding.
 - Support full duplex based on IEEE802.3x and half duplex based on backpressure.
- Intelligent PoE power supply
 - 4 ports 10/100/1000Base-T RJ45 ports support PoE power supply to meet the needs of PoE power supply in security monitoring, teleconferencing systems, and wireless coverage.
 - Conforms to the IEEE 802.3af/at PoE power supply standard, automatically recognizes PoE devices for power supply, without damaging non-POE devices. The maximum POE output power of the entire device reaches

65W(at-110W), and the maximum POE output power of a single port is 30 W.

- The PoE port supports the priority mechanism. When the remaining power is insufficient, the power supply of the high-priority port is preferentially guaranteed to prevent the device from being overloaded.
- The equipment is stable and reliable
 - The host has low power consumption, no fan, galvanized steel metal shell, excellent heat dissipation, and ensure stable operation of products.
 - The equipment fully meets the requirements of CCC, CE, FCC and RoHS safety regulations, and is safe and reliable.
 - AC/DC power supply, high redundancy design, provides long-term stable PoE power output.
- Easy to operate
 - Plug and play, no configuration, simple and convenient.
 - The user can easily understand the working status of the device through the power indicator (PWR), port status indicator (Link), and POE operation indicator.
