

Innovapure® MBT

MICRO-BORE TUBING

Available in a range of application specific materials with broad chemical resistance for lab, environmental, analytical, clinical and industrial automated fluid sample analysis.

Analytical

Innovapure® MBT series tubing

Innovapure® MBT tubing are available in 2 collars or 3 collars configurations, from Innovaprene® long life peristaltic pump tubing to chemical resistant Innovafluor® K tubing. Our professional extrusion experience enables tight I.D./O.D. tolerance control, thus provides optimal fluid control. Our new MBT product lines have provided alternative solutions to fluid system needs in ICP, CEMS, NH₂-N Analyser, TOC, COD, TP analysers.

Features

- Tight I.D. / O.D. tolerance
- Accurate flow rate for reproducible results
- Available in 2 or 3 collars
- Custom assemblies and tubing set
- Resistance to chemicals
- Available in a variety of diameters to ensure fit

Regulations

- USP Class VI
- ISO10993

Applications

- CEMS
- ICP
- NH₂-N analyser
- TOC
- COD
- TP analyser

* other sizes can be customized

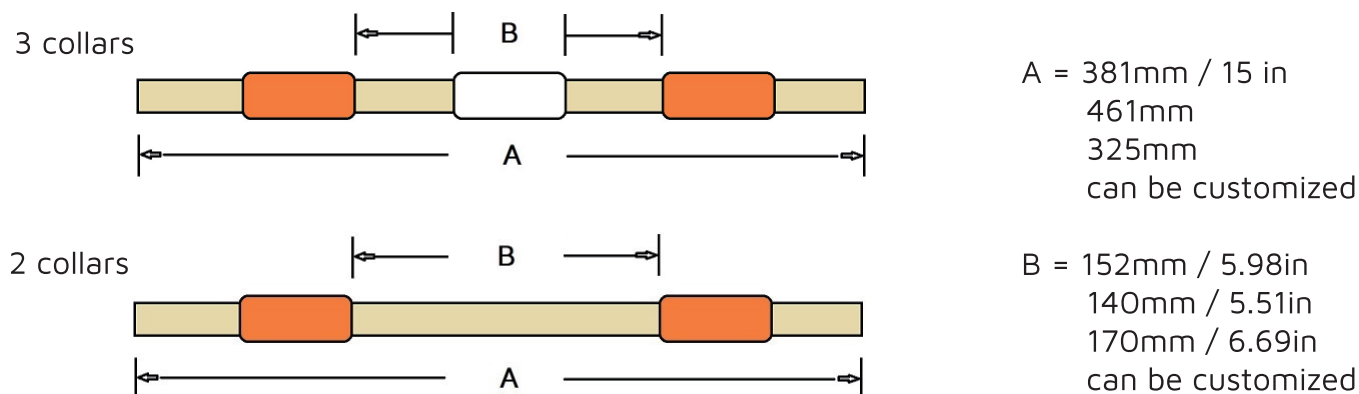

XXX are codes for tubing materials

PP5 - Innovaprene® P 60 longlife peristaltic pump tubing

L36 - Innovalene® MED 65 Non DEHP, clear PVC tubing

L35 - Innovalene® 3500 fuel and solvent resistant PVC grade in yellow color

FK4 - Innovafluor® K fluoroelastomer pump tubing, broad resistance to aggressive chemicals and solvents

Innovapure® MBT series tubing assemblies consist of a variety of tubing materials and collars, collar distance and tubing length can be customized per customer requirement.

Chemical compatibility chart is available on www.innovapure.com or call Innovapure sales representative.
